

BJ Enabler Phone

Phone with wireless control

Ref:
BJ-231

BJ Enabler Phone allows you to control a hands-free phone remotely by using any of the BJ System controllers or locally using your favourite switch. You can make calls by using the speed dial function or digit dialing, as well as answer and hang up in an autonomous way. Speak with whoever you want to as much as you want!

BJ Enabler Phone is based on two elements: a phone with a hands-free speaker and the enabler that belongs to the BJ System which allows wireless control.

- ✓ Control a hands-free phone **remotely via any BJ System controller** or locally using your favourite switches.
- ✓ **Make calls by using the speed dial** function stored in any of the 10 indirect memories or use the digit dialing function.
- ✓ Answer your phone and hang up a call at any time **in an autonomous way**.
- ✓ **Dial numbers during a call** to achieve control over the switchboards or
- ✓ Control **up to two different phones** in the same environment.
- ✓ **Radio frequency** system that works through walls and other obstacles.

The BJ enablers can be activated with any of the controllers of the BJ system or with a switch.
